Encased Memories

Our Encased Memories were created as a way to preserve the perishable items that would be destroyed by the high temperatures of molten glass. Items like flowers and jewelry can now be showcased in a beautiful glass sculpture.

We blow the sculptures with a specific opening size at the bottom. After we receive your precious keepsake, we place it inside a hollow chamber in the sculpture and seal it closed with a special U.V. light-activated glass epoxy; preserving your unique memorial forever.
